

Biometric Screening Order

1. Review paperwork and Triad Care inc. consent form
 - Review Triad Care Inc.'s privacy policy and answer the participant's questions before proceeding.
 - Ensure the participant's biometric screening form is filled out completely.
2. Blood Pressure
 - Use your judgement. You may delay the blood pressure measurement if the participant arrives after walking up stairs, etc.
 - Complete a manual blood pressure reading if the participant's blood pressure is > 140/90 mm Hg or if the participant reports an abnormal reading.
3. Complete fingerstick for glucose and lipid panel (Cardio Chek®).
 - Allow the Cardio Chek® machine to run tests while you complete the measurements below.
4. Weight
 - Allow the participant to remove his or her shoes.
5. Waist and hip circumference
6. Body fat analyzer
 - Screen for an implantable device and pregnancy before proceeding with the body fat analyzer.
7. Record glucose and lipid panel results and time
 - Record glucose and lipid results on Triad Care, Inc. documents.
8. Transfer the participant's results to the biometric screening results take home form
 - Triad Care, Inc. paperwork must be completed FIRST, before results are transferred to the participant's take home form.
9. Review results with the participant
 - Do not announce the participant's results aloud. Instead, point to values and verbally discuss desired value ranges.
10. For participants receiving vaccinations, review vaccine administration record(s) and administer vaccines
